

The ACRM course, the first of its kind in Lebanon, offers to participants the opportunity to practice managing anesthetic emergencies using fully immersive drills in a real clinical area. It also improves anesthesiologists' non-technical skills using ACRM key behaviors principles: anticipation and planning, communication, leadership and assertiveness, use of all available resources, distribution of workload and mobilization of help and re-evaluation of situations.

Audience: Anesthesiologists, Anesthesia residents, Nurse anesthetists
Venue: LAU-Clinical Simulation Center, Chagoury Health Sciences Center,
4th Floor - LAU, Byblos Campus
Date and Time: Friday April 20, 2018, from 09:00 am to 04:00 pm

Experts:

- **Ralf Krage, MD, PhD** Director, ADAM simulation group at the VU University Medical Center, Amsterdam, The Netherlands.
